“L” (layered) means that the wood I have in this species is not thick enough for that size ocarina, and it will have to be laminated with other woods to build up the thickness. Any of the other woods can also be laminated for an additional cost of \$40. This lamination works well and does not affect the tone of the instrument. Multiple woods create a striking appearance as shown in the ocarina above. See more examples at:

<http://hindocarina.com/gallery/>

The Zelda Triforce symbol made of Bloodwood and Yellowheart can be inlaid for an additional \$40. See an example here: <http://hindocarina.com/discover/zelda.shtml>  
The above example is also one of the layered ocarinas.

“n/a” = not available

B. Rosewood = Bolivian Rosewood, also called Morado

H. Rosewood = Honduras Rosewood
